

# ECCU FUEL PRICES

Disseminated on 25 June 2025

In May 2025, Saint Christopher (St Kitts) and Nevis recorded the lowest average gasoline prices (EC\$) per imperial gallon

In May 2025, Saint Vincent and the Grenadines recorded the lowest average diesel prices (EC\$) per imperial gallon

There was a 1.3% increase in the average price (EC\$) of gasoline (per imperial gallon) in the ECCU in May 2025 compared to April 2025

There was a 1.8% decrease in the average price (EC\$) of diesel (per imperial gallon) in the ECCU in May 2025 compared to April 2025

# ECCU FUEL PRICES

Liquefied petroleum gas (LPG) is better-known as cooking gas.

## In May 2025, Saint Christopher (St Kitts) and Nevis recorded the lowest price (EC\$) of the 20-pound cylinder of LPG

## In May 2025, Saint Christopher (St Kitts) and Nevis recorded the lowest price (EC\$) of the 100-pound cylinder of LPG

## There was a 0.6% decrease in the average price of the 20-pound LPG in the ECCU in May 2025 compared to April 2025

## There was a 2.5% decrease in the average price of the 100-pound LPG in the ECCU in May 2025 compared to April 2025

# INTERNATIONAL CRUDE OIL PRICES

Crude oil is used to produce several products including gasoline, diesel and liquefied petroleum gas (LPG).

A barrel of crude oil is equivalent to approximately 35 imperial gallons.

Over a 10-year period, the highest price of international crude oil per barrel (EC\$) was recorded in 2022

There was a 3.2% decrease in the price of international crude oil per barrel (EC\$) in May 2025 compared to April 2025

Average gasoline and diesel prices (EC\$) per imperial gallon in the ECCU generally tracked the movement in average international crude oil prices (EC\$) per imperial gallon

The average international crude oil price per imperial gallon was derived by dividing the price per barrel by 35. See introductory statements on this page.

While international crude oil prices (EC\$) experienced some volatility, the average price of the 20-pound and 100-pound cylinder of LPG in the ECCU remained relatively stable

On 20 June 2025, a barrel of crude oil (EC\$) was 8.8% lower than a year ago

# NOTES TO CHARTS

## Please note the following caveats to the fuel data:

**Anguilla:** the average retail price for regular 87 octane gasoline and the average retail price for ultra-low sulphur diesel are utilised.

**Antigua and Barbuda:** the retail price for US Waterborne unleaded 87 gasoline and the retail price for ultra-low sulphur diesel are utilised.

**Commonwealth of Dominica:** the retail price for unleaded gasoline and the retail price for high-sulphur diesel are utilised.

**Grenada:** the retail price for regular gasoline and the retail price for ultra-low sulphur diesel are utilised.

**Montserrat:** the retail price for regular gasoline and premium gasoline, and the retail price for regular diesel and ultra-low sulphur diesel are utilised.

**Saint Christopher (St Kitts) and Nevis:** the retail price for unleaded gasoline and the retail price for diesel are utilised. There are two (2) data sources for diesel – Delta Petroleum St Kitts Ltd and Sol St Kitts & Nevis Ltd. Delta Petroleum St Kitts Ltd provides prices on ultra-low sulphur diesel from which an average is calculated. Sol St Kitts & Nevis Ltd provides the price of ultra-low sulphur diesel as at the end of the month.

**Saint Lucia:** the retail price for regular unleaded gasoline and the retail price for low-sulphur diesel are utilised.

**Saint Vincent and the Grenadines:** the retail price for gasoline and the average retail price for high- and low-sulphur diesel are utilised.

**General:** the retail prices for petroleum products depend on several factors including the imported price of the fuel product; government policies such as taxes, duties and subsidies; the wholesaler's margin; and the retailer's margin.

When there is more than one price change in a month, the average of the said prices is utilised.

**International Crude Oil Prices:** these prices are recorded in United States dollars per barrel, however, the prices stated herein were converted to Eastern Caribbean dollars at the rate of 2.70.
